Suction cup OF40x110P Polyurethane 40

This program of oval suction cups has characteristics that are specially suited for handling of metal-sheet material.

- Suitable for flat and rough surfaces.
- Fair stability and little inherent movement.
- · Recommended when the lifting force is parallel to the surface of the object.
- Cleats prevent thin, sensitive objects from being deformed and give extra friction when the lifting force is parallel to the surface of the object.
- DURAFLEX® are suction cups manufactured in a specially developed material that features the elasticity
 of rubber and wear resistance of polyurethane. The material does not leave any marks on the objects
 handled.
